TN5

BUSINESS CHALLENGE

Customer needed to refuel class 8 trucks in the shortest possible time, as well as also being able to refuel trucks and vehicles that only have NGV1 receptacles.

SOLUTION

Replace their previous system with our market proven TK26 assembly, which has become a popular and reliable industry standard. A TK4 nozzle and TN5 adapter were also introduced along with a special adapter in order to refuel NGV1 and NGV2 systems efficiently.

IMPACT

Reduced refueling time by 15% with an easy to use and much safer alternative for the dispenser operator.
